Sample PadiSense

Early warning of rice crop disease and flood stress for smallholder farmers in Southeast Asia, from a phone photo and local weather data.

Fictional company created for a hackathon demo. All names and figures are invented.

PROBLEM

Smallholders find out about crop disease too late

- Blast and brown spot can wipe out 20–30% of a paddy harvest before farmers notice.
- Extension officers each cover thousands of farmers, so advice arrives weeks late.
- Flash floods are getting more frequent, and farmers have no plot-level warning.

SOLUTION

Snap a leaf, get advice in Bahasa in under a minute

Detect

An on-device AI model spots 8 common paddy diseases from a phone photo, even offline.

Warn

Plot-level flood and heat alerts from open weather data, sent over WhatsApp.

Act

Simple treatment steps in Malay and Bahasa Indonesia, reviewed by agronomists.

TRACTION

Working prototype, three paid pilots

3

farmer co-operative pilots in Kedah and Perak

140

active farmers using the app weekly

RM 18k

pilot revenue to date; no institutional funding raised yet

Stage: **pre-seed**. Prototype live with pilot customers; not yet raising a priced round.

MARKET

Rice is grown by 100M+ smallholder households across ASEAN

- Start: Malaysia's granary areas (Kedah, Perak, Selangor).
- Next: Indonesia (Java) and the Philippines (Central Luzon) through co-op partners.
- Buyers: co-operatives, input suppliers and crop insurers who pay per farmer.

BUSINESS MODEL

Co-ops pay; farmers use it free

- RM 4 per farmer per month, billed to the co-operative.
- Data-sharing partnerships with crop insurers (anonymised, opt-in).
- Gross margin target: 70%.
- Break-even at roughly 12,000 farmers.

TEAM

Two founders, both from farming families

Aina R.

CEO · Malaysian · ex-agronomist with a state agriculture agency, 7 years in the field.

Bayu S.

CTO · Indonesian · machine-learning engineer, built on-device vision models for mobile.

Advisers: a plant pathologist and a co-operative federation leader (both fictional).

COMPANY

Company facts

Legal entity	Sample PadiSense Sdn. Bhd.
Incorporated in	Malaysia (2025)
Headquarters	Kuala Lumpur, Malaysia
Stage	Pre-seed
Sectors	Agritech, AI, climate
Team size	5 (2 founders, 3 staff)

THE ASK

RM 300,000 non-dilutive

We prefer **grants and other equity-free funding** for the next 12 months, so we can prove retention before giving up equity.

We are looking for:

- Grants
- Accelerator programmes
- Cloud credits
- Government schemes

Use of funds: expand to 1,000 farmers, add Bahasa Indonesia voice support, start an Indonesian pilot.

THANK YOU
