FINTECH · B2B SAAS

Sample LedgerLah

Bookkeeping and invoice financing for micro-businesses across Southeast Asia, straight from WhatsApp receipts.

Fictional company created for a hackathon demo. All names and figures are invented.

PROBLEM

Micro-businesses run on receipts in a shoebox

- Most hawkers and small shops keep no digital books, so banks can't assess them.
- Without books they can't get working capital, even with steady sales.
- Accounting software is built for accountants, not for a stall owner on a phone.

PRODUCT

Forward a receipt, get books and credit

Capture

Owners forward receipts and invoices on WhatsApp; we read them automatically.

Books

Monthly profit and loss and tax-ready summaries, in English and Vietnamese.

Credit

Invoice financing through licensed partner lenders, priced on real cash flow.

TRACTION

Paying customers in two markets

2,400

paying micro-businesses in Singapore and Ho Chi Minh City

S$41k

monthly recurring revenue, growing 12% month on month

S$300k

pre-seed raised from angels in 2025

We are a **seed-stage** company with product-market fit in our first two cities.

TEAM

Operators from banking and payments

Wei Ling T.

CEO · Singaporean · 8 years in SME lending at a regional bank.

Minh N.

CTO · Vietnamese · built document-reading systems at a payments company.

Team of 14 across Singapore and Ho Chi Minh City.

COMPANY

Company facts

THE ASK

Raising S$1.5M seed (equity)

We are raising a priced seed round from VCs and angels. We are happy to give up equity to the right partners who bring lending relationships.

We are looking for:

- Seed investment
- Accelerator programmes

Use of funds: launch in Kuala Lumpur and Jakarta, and grow the credit book with partner lenders.
